

Nozzle Shaft for YG12/YS12 Machines

This is a nozzle shaft designed for use in YG12 and YS12 machinery. It functions as a spare part.

Product Overview

Precision Nozzle Shaft for SMT Machinery

This genuine, high-quality nozzle shaft is precision-engineered for use with high-speed surface mount technology equipment. It serves as a vital component for ensuring consistent pick-and-place performance across multiple machine series, including YG12 and YS12. Built for durability and precision, this spare part helps maintain optimal machine uptime and assembly accuracy.

Compatibility and Part Identifiers

Part Number Cross-Reference

- KGB-M71S0-50X
- KV8-M712S-A0X
- KM9-M7107-00X
- KM9-M7106-00X
- KV8-M713S-A0X
- KV8-M711S-A0X
- KGB-M711S-A0X
- KGB-M712S-A0X
- KGT-M712S-A0X

Primary Part Number	KHY-M711S-A0
Compatible Machine Models	YG12, YS12, YV100X, YV100II, YV100Xg, YG200X
