

NP60-85 Grain Dryer

The NP60-85 grain dryer is a high-capacity system designed for the efficient and uniform drying of various grains. It features a modular design for easy expansion and maintenance.

Overview

High-Capacity Grain Drying Solution

The NP60-85 grain dryer is a high-capacity drying system engineered for the efficient and uniform processing of various grains. Designed for large-scale agricultural and commercial facilities, it utilizes advanced airflow technology and precise temperature control to maximize drying performance while minimizing energy consumption. The system features a modular design, ensuring both ease of maintenance and scalability for growing operations.

Technical Specifications

System Components

- Robust feeding system
- Multi-stage drying tower
- Consistent discharge mechanism
- Integrated safety systems

Drying Technology

Advanced Airflow, Modular Design, Multi-stage Drying
