Product Overview

Versatile Nut Coating Solution

This stainless steel coating machine is engineered for the efficient processing of various food products, including spiced peanuts, chocolate-covered nuts, spiced almonds, and flavor-infused cashews. Beyond the food industry, it serves as a reliable tool for coating, glazing, and granulating applications in pharmaceutical production. The rotating drum design ensures a smooth, polished finish while protecting delicate cores from oxidation, humidity, and volatile flavor loss.

Applications & Usage

Suitable Food Products

Spiced Peanuts, Chocolate Peanuts, Spiced Almonds, Flavor Cashew Nut, Confectionery, Pharmaceutical Tablets

Technical Features

Stainless steel coating machines designed for consistent, high-quality nut processing.

Process Advantages

- Uniform coating application
- Surface polishing
- Oxidation protection
- Moisture resistance
- Masking of peculiar smells

Build Material

High-grade stainless steel for hygiene and durability

Support & Service

Service Terms

Scenario	Support Level
Design defect	Full responsibility and free replacement parts
Humane factors	Technical support provided

Warranty Coverage

One-year warranty with lifelong maintenance support
