Product Overview

Professional Nut Slicing Solution

This multi-functional slicing machine is engineered for the precise processing of various nuts, including peanuts, almonds, pistachios, and cashews. It is an essential tool for food processing facilities, enabling consistent slicing for use in bread, cakes, biscuits, confectionery, and ice cream production. The machine is designed for high-efficiency, reliable operation to meet the demands of commercial food manufacturing.

Capabilities

Common Applications

- Bread production
- Cake and biscuit manufacturing
- Confectionery and candy making
- Peanut brittle production
- Ice cream and dessert ingredients

Compatible Nuts

Peanuts, Almonds, Pistachios, Cashews

Service & Support

Warranty and Maintenance

The equipment typically comes with a one-year warranty period and offers lifelong maintenance support. Technical support is provided for all users. Warranty coverage applies to design defects, with free replacement parts provided for such issues. Damage resulting from human error is the responsibility of the user.
