

Nylon Braided USB Data Cable

This USB cable features a durable nylon braided construction. It supports 2.4A current and has been swing tested to over 10,000 cycles for longevity.

Product Overview

Premium Durability and Performance

This nylon braided USB data cable is engineered for maximum signal quality and structural strength. Featuring a robust nylon fiber exterior, it offers excellent flexibility while protecting the high-quality copper wiring within. Designed to support reliable charging and data synchronization for Apple devices with lightning connectors.
