

Nylon Cable Tie Injection Molding Machine

This injection molding machine is designed for the efficient production of nylon cable ties. It features optimized injection parameters and advanced temperature control to maximize productivity and minimize material waste.

Overview

High-Performance Production Solution

This injection molding machine is specifically engineered for the efficient, large-scale production of nylon cable ties. Featuring robust construction and precise control systems, it ensures consistent output quality while minimizing material waste. With advanced temperature control and optimized material feeding, this machine is designed to meet stringent industry standards for strength and durability in cable tie manufacturing.

Machine Specifications

Model ID	K288F
Primary Application	Nylon Cable Ties, Injection Molding

Key Features

Performance Highlights

- Robust construction for high-volume manufacturing
- Precise injection parameter control
- Advanced temperature regulation system
- Optimized material feeding mechanism
- Reduced material waste design
