

Nylon Cable Ties

Nylon cable ties are versatile fasteners for bundling and securing items. Constructed from durable nylon, they offer high tensile strength and resistance to abrasion, chemicals, and temperature variations.

Product Overview

Professional Grade Nylon Cable Ties

These high-quality nylon cable ties, also known as zip ties, provide a reliable solution for bundling and securing wires, cables, and various components in industrial and commercial environments. Manufactured from durable Polyamide 6.6, they offer exceptional tensile strength and resistance to harsh environmental factors including oils, greases, and chloride solvents. Designed for performance and safety, these ties feature a self-locking mechanism that ensures a secure, adjustable hold for diverse electrical, automotive, and general-purpose fastening applications.

Material and Compliance

Material Composition

- Natural: Polyamide 6.6
- UV Black: Polyamide 6.6 + carbon black
- Colored: Polyamide 6.6 + Colorant

Certifications and Compliance

UL 94-V2, UL E258930, EN (IEC) 62275:2015, REACH, ROHS, PAHS

Technical Specifications

Operating Temperature Range

-40 C

Min Operation Temperature

85 C

Max Operation Temperature

Min Installation Temperature

-10 C

Max Short-Term Temperature

110 C

Chemical Resistance

Chemical Resistance Profile

Agent Type	Resistance Level
Bases, Oils, Greases	Good
Chloride Solvents	Good
Acids	Limited
Phenols	Not Resistant
