Product Overview

High-Performance Protection

This nylon multifilament hose sleeve is engineered to provide superior protection for hydraulic hoses, pneumatic lines, and wire harnesses. Its tightly woven construction offers exceptional resistance to abrasion, bursting, and environmental degradation, effectively shielding machinery and personnel from potential fluid leaks or spills. Designed for flexibility and ease of installation, this sleeve is an ideal solution for extending the lifespan of critical components in demanding industrial and construction environments.

Technical Specifications

Compliance

MSHA

Material

Nylon multifilament

Construction

Tight woven

Key Features

Abrasion Resistant, Burst Resistant, Flexible, High Durability

Applications

Suitable Applications

- Hydraulic pipes
- Rubber hoses
- Plastic pipes
- Wire harnesses

Target Industries

- Construction machinery
- Industrial manufacturing
- Automotive
