

Off-Grid Solar Power and Lighting Kit

This kit provides off-grid power and lighting solutions using solar energy. It allows users to power small electronic devices and illuminate spaces.

Product Overview

Off-Grid Solar Power Solution

This comprehensive off-grid solar power and lighting kit provides a reliable energy solution for remote or off-grid locations. The system integrates a high-efficiency solar panel with a versatile power distribution unit, capable of charging small electronic devices via multiple USB ports. Complete with three LED bulbs and essential accessories, this kit ensures sustainable lighting and connectivity wherever standard electrical grid access is limited.

Technical Specifications

Package Contents

- Solar Panel
- Power Distribution Unit
- 3 x LED Bulbs
- USB Adapter Cables
- Media Player

Ideal Applications

Off-Grid Living • Emergency Lighting • Camping • Remote Work

Connectivity & Charging

Multi-USB Output, DC Lighting Output, Built-in Media Player
