

Off-Road Dirt Bike

This dirt bike is designed for rugged off-road environments. It features knobby tires for superior traction, a high-mounted exhaust, and long-travel suspension.

Overview

High-Performance Off-Road Mobility

The STF 125 is a purpose-built dirt bike engineered for agility and durability in challenging off-road environments. Featuring a lightweight yet sturdy frame and minimal bodywork, it offers superior maneuverability for riders navigating uneven terrain. With specialized components like long-travel suspension and high-mounted exhaust, this machine is designed to absorb shocks and maintain performance during demanding rides.

Technical Specifications

Model Designation	STF 125
Key Design Features	Knobby Tires, High-Mounted Exhaust, Long-Travel Suspension, Lightweight Frame

Performance

Terrain Suitability

Off-Road • Uneven Terrain • Rough Trails

Handling Characteristics

- Enhanced traction via knobby tires
- High-mounted exhaust for water submersion protection
- Shock absorption via long-travel suspension
- Narrow, high seat for rider control
