

Off-Road Radial Tire

This radial tire provides excellent traction and exceptional reliability. It features an aggressive self-cleaning tread pattern for excellent traction, flotation, and long tread life.

Product Overview

High-Performance Radial OTR Tire

This heavy-duty radial off-the-road tire is engineered for demanding construction and mining applications. Its advanced design incorporates an aggressive self-cleaning tread pattern to ensure superior traction, flotation, and extended service life. With a rugged shoulder construction and a specialized durable compound, this tire provides exceptional resistance to impacts and punctures while promoting fuel efficiency.
