Product Overview

Efficient Soil Preparation

This offset disc harrow is specifically engineered for compact tractors, making it an ideal solution for small-scale farming and land management. It excels at clearing crop residue, breaking up hardened soil, and leveling land post-tillage, ensuring a smooth and well-prepared seedbed. Constructed with high-quality 65Mn spring steel blades and a durable bearing assembly, this implement offers reliable performance even in challenging heavy clay or weedy conditions.

Technical Specifications

Model Performance Data

Model	Width (mm)	Disc Qty	Weight (kg)	Power (hp)
1BQX-1.1	1100	12	200	15
1BQX-1.3	1300	14	220	18
1BQX-1.5	1500	16	240	25
1BQX-1.7	1700	18	260	40
1BQX-1.9	1900	20	310	50
1BQX-2.3	2300	24	360	60

Blade Material	65Mn spring steel
Working Depth	120 mm
Compatible Linkage	Three-point suspension I type, Three-point suspension II type

Key Features

Design Highlights

- Offset disc arrangement for improved soil coverage
- Includes scrapers for each disc blade to prevent clogging
- Adjustable working depth
- Robust and durable bearing assembly
- Suitable for heavy clay, waste land, and weedy fields
