

Offset Jaw Tongs

Offset jaw tongs are specialized hand tools designed for cutting and gripping materials with precision. Featuring offset jaws, these tongs provide enhanced leverage and access in tight spaces.

Product Overview

Precision Offset Jaw Tongs

These specialized hand tools are engineered for cutting and gripping materials with exceptional precision. Featuring a distinct offset jaw design, they provide enhanced leverage and superior access when working in confined or tight spaces. Constructed from durable hardened steel, these tongs are built for longevity and reliable, heavy-duty performance.

Technical Specifications

Jaw Type	Offset (Eccentric)
Material	Hardened Steel
Handle Design	Ergonomic, anti-fatigue

Applications

Suitable Applications	Electrical Work, Jewelry Making, General Repairs, Precision Cutting, Gripping
