

Offshore Patrol Vessel for Maritime Security

This offshore patrol vessel is designed for maritime security and surveillance. It is equipped with a forward-mounted gun, radar systems, and a helicopter landing deck at the stern.

Overview

Advanced Maritime Security Platform

This offshore patrol vessel is purpose-built for maritime security and surveillance operations in both coastal and deep-water environments. Featuring a streamlined, high-efficiency hull design, the vessel integrates advanced navigation and radar systems to ensure comprehensive situational awareness. Its versatile deck configuration includes a forward-mounted gun system and a dedicated helicopter landing pad, providing the operational flexibility required for extended patrol missions and rapid response capabilities.

Technical Specifications

Primary Armament	Forward-mounted gun system
Aviation Support	Yes
Key Operational Systems	Advanced Navigation, Radar Systems, Helicopter Landing Deck, Surveillance Suite

Operational Capabilities

Mission Capabilities

- Maritime Security
- Surveillance
- Coastal Patrol
- Offshore Operations
