Product Overview

Efficient Drum Handling

This forklift-exclusive instrument is engineered for the secure handling and stacking of industrial drums. Featuring a delicate yet robust loading design, it utilizes a strengthened double olecranon component to ensure superior safety performance. The adjustable height mechanism allows for versatile operation, making it compatible with a wide variety of steel and plastic drums that feature edges.

Technical Specifications

Safety Features

- Double olecranon component
- Adjustable height mechanism
- High-strength construction
- Secure locking mechanism

Ideal Applications

Warehousing • Manufacturing • Distribution Centers • Industrial Settings • Agricultural Settings

Compatible Drum Types

Steel Drums, Plastic Drums, Drums with Edges
