

# Oil-Free Air Compressor for Spraying and Spreading

This oil-free air compressor is designed for spraying machinery and spreading equipment. Its compact design includes dual cylinders, a pressure regulator, and a safety valve.

## Product Overview

### Professional Oil-Free Air Compression

The JKW10 is a specialized air compressor engineered for demanding spraying machinery and spreading equipment applications. Its oil-free design ensures clean air output, essential for precision coating and finishing tasks. Compact and portable, this unit is built for versatility, featuring integrated controls for pressure management and safety.

## Technical Specifications

Cylinder Configuration	Dual cylinder
Lubrication System	Oil-free

## Control & Safety

Integrated Safety Features	Pressure Regulator, Pressure Gauge, Safety Valve
----------------------------	--

## Design & Utility

### Design Advantages

- Compact and portable form factor
- Top-mounted handle for easy transport
- Stabilized tank for consistent air supply
