Overview

Professional Oil-Free Performance

This oil-free air compressor is engineered for high-efficiency performance with a focus on modern industrial design. It features rapid air storage and a high flow rate, making it suitable for demanding professional applications. Built with a silenced motor and overload protection, this unit ensures reliable operation, low vibration, and long-term durability for various pneumatic tasks.

Performance Metrics

Performance Metrics

900 W

Input Power

2800 rpm

Motor Speed

8 bar

Max Pressure

Air Flow Capacity

Pressure Level	Flow Rate
4 bar	100 L/min
8 bar	70 L/min

Technical Specifications

Tank Capacity	12 L
Voltage/Frequency	220V/50Hz
Gross Weight	14 KG
Package Size	48 x 19.5 x 50.5 cm

Key Features

Operational Advantages

Oil-Free Operation • Low Noise • Low Vibration • Overload Protection • Fast Storage • Low Temperature Rise
