

Oil-Free Air Compressor with 50L Tank

This oil-free air compressor provides clean air delivery for applications where air purity is critical. Its fast storage and high flow supply design ensures consistent performance and quick recovery times.

Overview

Professional Oil-Free Performance

This high-performance oil-free air compressor is designed for efficient and reliable compressed air supply in demanding industrial and commercial environments. Featuring a dual-motor system, it delivers consistent high-flow output while maintaining clean air delivery, making it ideal for applications where air purity is critical. Its robust design includes overload protection and noise-reduction technology to ensure long-lasting operation with minimal maintenance.

Performance Metrics

Airflow Performance

200 L/min

Flow @ 8 bar

290 L/min

Flow @ 4 bar

Motor Specifications

- Input Power: 1450W x 2
- Motor Speed: 2800 rpm
- Includes Overload Protection
- High-speed silenced motor

Technical Specifications

Tank Capacity	50 L
Voltage Compatibility	220V/50Hz, 110V/60Hz
Gross Weight	50 kg
Package Dimensions	68 x 35 x 64 cm

Key Features

Operational Benefits

Oil-Free Technology • Low Noise • Low Vibration • Low Temperature Rise • HVLP Compatible
