

Oil-Free Piston Air Compressor

This oil-free piston air compressor provides clean air for various applications. Its quiet operation minimizes noise, making it suitable for sensitive environments.

Product Overview

Clean and Quiet Air Compression

This oil-free piston air compressor is engineered for clean air delivery, making it an ideal choice for sensitive industrial and professional applications. Its oil-free pump design significantly reduces maintenance requirements and operational costs while ensuring consistent performance. With a focus on quiet operation, this unit minimizes noise pollution, allowing for use in environments where sound control is essential.

Performance Metrics

Key Performance Indicators

3 KW

Power

400 L/M

Air Delivery

1 MPa

Pressure

Technical Specifications

Electrical Requirements

Parameter	Value
Voltage	277/380 V AC
IP Grade	25

Operational Data

- Noise Level: 70 db
- Outlet Temperature: <88 °C

Dimensions and Weight

Physical Dimensions	1150 x 490 x 820 mm
Net Weight	65 KG
