Product Overview

Industrial Oil-Free Performance

This vertical-type oil-free piston compressor is engineered for demanding industrial environments where air purity is critical. Its robust construction features a multi-stage compression system and an efficient cooling mechanism, ensuring reliable, continuous operation. Designed to eliminate the risk of oil contamination, this unit is an ideal solution for sensitive applications such as pharmaceutical production, food processing, and electronics manufacturing.

Key Features

Core Benefits

Oil-Free Design, Continuous Operation, High Efficiency, Low Maintenance, Corrosion-Resistant

Safety & Control

Safety Features

- Pressure relief valves
- Thermal overload protection
- Integrated control panel

Industry Applications

Suitable Industries

Pharmaceuticals • Food Processing • Electronics Manufacturing
