

Oil-Free Twin-Cylinder Air Compressor

This oil-free air compressor features a twin-cylinder design. Its performance is depicted in a pressure-flow rate curve, showing decreasing flow rate as pressure increases.

Overview

High-Performance Oil-Free Compression

The AP800 is a robust twin-cylinder air compressor engineered for clean, oil-free operation, making it ideal for sensitive applications where air purity is critical. Its compact design and efficient twin-cylinder configuration ensure reliable performance and consistent airflow. This unit is built for durability and precision, providing a steady output suitable for various industrial and professional pneumatic tasks.

Technical Specifications

Overall Width	271 mm
Overall Height	205 mm
Cylinder Height	130 mm
Fan Diameter	88.9 mm
Cable Length	223.2 mm

Performance Metrics

Performance Curve Data

160 L/min

Flow Rate at 0 Bar

100 L/min

Flow Rate at 8 Bar
