

# Oil Press Machine

The oil press machine is advanced oil processing machinery, characterized by a high oil output rate and good quality. It is suitable for processing various raw materials like peanut, beans, rape and cotton seeds, sesame, olive, sunflower, and coconut.

## Product Overview

### Industrial Oil Extraction Solution

The YZS-68 is a professional-grade oil press machine engineered for the efficient extraction of oil from a diverse range of seeds and nuts. Its robust construction ensures reliable performance and durability within demanding small to medium-scale production environments. This unit is designed to provide a cost-effective, high-quality solution for oil processing while offering operators precise control throughout the extraction cycle.

## Technical Specifications

### Motor Power

**5.5 kW**

Rated Power

### Model Identifier

YZS-68

## Operational Details

### Core Components

- Feeding hopper for continuous input
- High-pressure pressing chamber
- Integrated oil collection system

### Operation Type

Manually Operated, Hot Extruding
