

Oil Press Machine for Seeds and Nuts

This oil press is designed for extracting oil from various seeds and nuts. It features a durable construction with a horizontal pressing chamber, a feeding hopper, and a discharge outlet.

Overview

Robust Oil Extraction Solution

The ZX-10 Oil Press is a robust and efficient machine designed for extracting oil from various seeds and nuts. It features a durable construction with a horizontal pressing chamber, a feeding hopper, and a discharge outlet, ensuring optimal oil extraction via a powerful screw mechanism. This machine is ideal for small to medium-scale oil production, offering reliable performance for processing diverse oil-bearing materials like soybeans, peanuts, sunflower seeds, and rapeseed.

Technical Specifications

Suitable Materials

- Soybeans
- Peanuts
- Sunflower seeds
- Rapeseed

Key Design Features

Horizontal pressing chamber • Feeding hopper • Discharge outlet • Screw mechanism

Compatible Models

6YL-95, ZX-10
