

Oil Well Service Truck with Crane and Drilling Rig

This specialized vehicle is equipped with a crane and drilling apparatus for oil production and maintenance. It is mounted on a heavy-duty truck chassis and designed for on-site oil extraction and servicing in remote locations.

Overview

Heavy-Duty Oil Field Service Vehicle

This specialized oil well service truck is engineered for demanding oil production and maintenance operations in remote field environments. Built on a robust heavy-duty truck chassis, the vehicle integrates a powerful crane and drilling apparatus designed for efficient on-site servicing. With its specialized winch system and boom configuration, it provides the reliability and performance required for critical oil extraction tasks.

Technical Capabilities

Key Equipment	Crane, Drilling Rig, Winch System, Boom
Primary Application	Oil production, maintenance, and remote site servicing

Vehicle Configuration

Color Scheme	Green Cab • Yellow Equipment
Chassis Type	Heavy-duty truck
