

Oilless Air Compressor for Laboratories

The oilless air compressor series delivers power from 0.75 HP to 2.5 + 2.5 HP. It is recommended for studies and laboratories, providing clean air free of oily residues and condensation.

Overview

Air Tech Series Overview

The Air Tech Series features specialized oilless air compressors engineered specifically for laboratory and clinical environments. These units provide a reliable source of clean, high-quality compressed air that is completely free of oily residues, slag, and condensation. Designed for precision and cleanliness, they are an ideal solution for sensitive applications where air purity is critical.

Technical Specifications

Power Range

0.75 HP

Minimum Power

5 HP

Maximum Power

Lubrication System

Oilless

Recommended Applications

- Laboratories
- Studies
- Dental clinics
- Medical facilities

Key Features

Operational Characteristics

- Silent operation
- High-performance piston design
- Precise pressure regulation
- Robust construction

Air Quality Benefits

Oil-free, No slag, No condensation, Clean air
