

Omnidirectional TV Antenna

This omnidirectional TV antenna receives signals from all directions, removing the need for adjustments. Its design maximizes signal clarity and provides reliable access to digital TV in urban and rural areas.

Product Overview

High-Performance Omnidirectional Reception

This omnidirectional TV antenna is engineered to capture broadcast signals from all directions, eliminating the need for manual positioning or rotating. Its advanced multi-element hub design ensures consistent signal strength and broad coverage in diverse environments. Built with weather-resistant materials, it provides a durable and reliable solution for high-clarity digital TV reception in both urban and rural settings.

Technical Specifications

Build Quality

- Durable weather-resistant construction
- Multiple radiating elements
- Interference-minimizing design

Reception Pattern	Omnidirectional
Suitable Environments	Urban, Rural, Outdoor

Performance Highlights

Performance Benefits

360 degrees

Coverage Angle

1 none

Adjustment Required
