

On-Camera Video Light with Barn Doors

This on-camera video light uses a highly effective light cup for illumination. It provides energy conservation and long life.

Product Overview

Professional On-Camera Lighting

This high-quality on-camera video light is engineered for professional production environments. It features integrated barn doors, allowing for precise light shaping and directional control during filming. Designed with a dexterous and compact form factor, it ensures reliability and ease of use for various video recording applications.

Technical Specifications

Battery Type	Maintenance-free lead-acid battery
Design Features	On-camera mount, Adjustable barn doors, Compact design
Primary Application	Professional video production and recording
