

On-Road/Off-Road Motorcycle

This motorcycle is designed for both on-road and off-road use. It features a robust engine, durable suspension, and a rugged frame capable of handling various terrains.

Overview

Versatile Performance

This FT200GY-5 motorcycle is engineered for dual-purpose utility, seamlessly transitioning between on-road commuting and off-road exploration. Built with a robust engine and durable suspension, it offers reliable performance across various terrains. Its design prioritizes rider control and safety, featuring a responsive front disc brake and a high-mounted exhaust for challenging conditions.
