

# One-Ton Capacity Cargo Tricycle with Dual Rear Wheels

This heavy-duty cargo tricycle is designed to carry loads up to one ton. It features double rear tires for enhanced stability on various road surfaces and a water-cooled engine for reliable performance in hot climates.

## ADDITIONAL IMAGES

## Overview

### Heavy-Duty Cargo Solution

This robust cargo tricycle is engineered for demanding industrial and commercial material handling. With a substantial one-ton load capacity and a durable 2.0mm thickness tube chassis, it provides reliable performance for heavy-duty transport. The vehicle features a 200cc water-cooled engine and a versatile 5-speed transmission, ensuring efficiency and power in various working environments.

## Performance & Engine

### Fuel Consumption

**3.5 L/100km**

Fuel Consumption

Engine Displacement	200 cc
Cooling System	Water Cooling
Transmission	5 Forward, 1 Reverse

## Physical Specifications

Load Capacity	1000 kg
Cargo Box Dimensions	2200 x 1300 mm
Gross Weight	430 kg
Chassis Thickness	2 mm

## Features & Configuration

### Available Colors

Blue • Red • Yellow

### Optional Features

Rear double wheels, Tipper
