

# Online Uninterruptible Power Supply (UPS)

This online UPS provides reliable power protection for critical equipment. Featuring double-conversion technology, it ensures a stable and clean power supply, isolating connected devices from power disturbances, voltage fluctuations, and outages.

## Overview

### FR-UK11A Series Online UPS

The FR-UK11A series Online UPS is designed to provide reliable, high-efficiency power protection for critical equipment such as data centers, server rooms, and industrial environments. Utilizing advanced double-conversion technology, it ensures a stable, clean power supply by isolating connected devices from voltage fluctuations, disturbances, and outages. This versatile unit supports both tower and rack-mount configurations, offering flexible installation options alongside advanced battery management for extended operational life.

## Key Features

### Key Features

- Double-conversion technology
- Advanced battery management system
- User-friendly LCD monitoring display
- Comprehensive remote management options
- Flexible tower and rack-mount installation

## Performance

### Design Configuration

Tower • Rack-mount

### Suitable Applications

Data Centers, Server Rooms, Industrial Environments
