

Online Uninterruptible Power Supply (UPS)

This online UPS delivers reliable power to critical equipment. Its double-conversion technology ensures stable output, protecting against power outages and surges.

Overview

FR-UK33 Series Online UPS

The FR-UK33 series Online UPS is a high-performance uninterruptible power supply engineered to deliver reliable and clean power to critical equipment. Utilizing advanced double-conversion technology, it ensures stable output voltage and frequency despite input fluctuations. This unit provides comprehensive protection against power outages, surges, and sags, making it an ideal solution for data centers, server rooms, and industrial environments where power continuity is mission-critical.

Technical Specifications

Technology	Double-conversion
Protection Capabilities	Power Outages, Surges, Sags, Voltage Fluctuations

Operational Features

Monitoring & Control	Yes
----------------------	-----

Applications

Recommended Use Cases

- Data Centers
- Server Rooms
- Industrial Environments
