

# Open Display Freezer for Retail

This open display freezer is designed for showcasing food products in retail environments. It features a transparent glass top for optimal visibility, adjustable temperature control and rolling casters.

## Product Overview

### Professional Retail Display

This open display freezer is engineered for high-visibility merchandising in retail environments such as supermarkets, convenience stores, and bakeries. It features a ventilated cooling system that eliminates frost buildup, ensuring food products remain fresh and clearly visible through double tempered insulating glass. Equipped with convenient mobility casters and automated condensation management, this unit is designed for both operational efficiency and ease of use.

## Technical Specifications

### Temperature Range

<b>2</b> Min Temperature	<b>10</b> Max Temperature
-----------------------------	------------------------------

### Cooling Type

Ventilated (No Frost)

## Features & Design

### Lighting

Internal LED

### Mobility

- 4 Castors total
- 2 Castors with brakes

### Glass Construction

Double tempered insulating glass

## Operational Maintenance

### Maintenance Features

Digital controller, Automatic condensation evaporation, Air inlet filter
