

Open-Side Shipping Container

This is an open-side shipping container designed for easy access and loading of goods. It is constructed of durable steel to withstand harsh conditions and ensure the safe transport of goods.

Product Overview

Versatile Loading Solution

The Open-Side Shipping Container is engineered for the seamless transport and storage of goods that are difficult to load through standard end doors. Featuring full-length side-access doors, it allows for the efficient handling of oversized, wide, or irregularly shaped cargo. Constructed from high-grade, durable steel with a robust wooden interior floor, this container is built to withstand rigorous transport conditions while maintaining the security of your goods.
