

Open-Sided Shipping Container for Packaging Machinery

This open-sided shipping container is designed for easy access and loading of goods. It features a sturdy frame and durable construction for secure transportation and storage.

Overview

Industrial Open-Sided Container

This open-sided shipping container is specifically engineered for the efficient transport and storage of packaging machinery and industrial components. Its robust frame and durable construction ensure maximum protection against environmental elements during transit. Designed for ease of access, this unit simplifies the loading and unloading process for heavy or bulky industrial equipment.

Technical Specifications

Key Features

- Open-sided design for easy loading
- Sturdy steel frame construction
- Weather-resistant exterior
- Optimized for industrial logistics

Container Type Code	22G2
Ideal For	Packaging Machinery, Industrial Parts, Heavy Equipment
