

Optical Lenses and Instrument Set

This set includes a variety of optical lenses and instruments. The components are suitable for optical experiments, measurements, or instrument assembly.

Product Overview

Precision Optical Instrumentation

This comprehensive Optical Lenses and Instrument Set provides a versatile collection of components designed for optical experimentation, precise measurements, and instrument assembly. The kit includes a variety of lenses and calibration tools, making it an essential resource for laboratory settings, educational environments, and optical research. Each component is crafted to ensure clarity and reliability in physical optical applications.

Included Components

Optical Lenses, Calibration Tools, Instrument Containers

Technical Specifications

Primary Applications

- Optical Experiments
- Precision Measurements
- Instrument Assembly
- Laboratory Research

Set Status

Full Set • Laboratory Grade
