

Optical Level Surveying Instrument

This optical level is a precision surveying instrument used for establishing points in the same horizontal plane. It features a high-quality optical system for clear and accurate readings and robust construction for durability.

Overview

Precision Optical Leveling

The NA24 Optical Level is a professional-grade surveying instrument engineered for high-accuracy leveling and horizontal plane verification. Designed for demanding field environments, it features a robust construction and a superior optical system that ensures clear, reliable readings. This instrument is an essential tool for construction, surveying, and engineering professionals requiring precise height measurements and alignments.

Technical Specifications

Key Features

- High-quality optical system
- Robust field-ready construction
- Precise leveling mechanisms
- Easy setup

Model Number	NA24
Primary Applications	Construction, Surveying, Engineering
Core Function	Establishing or verifying points in the same horizontal plane
