Product Overview

Smart Ambient Light Control

This optoelectronic light control switch provides an automated solution for managing outdoor lighting based on real-time ambient light levels. Designed for reliability, the unit remains unaffected by fluctuations in ambient temperature or humidity, ensuring consistent performance. It is an ideal, practical choice for controlling road lights, garden lighting, and security fixtures, helping to enhance convenience while optimizing energy usage.

Electrical Specifications

Power Source Options

Voltage Range	Rated Current
220-240V/AC	6
100-130V/AC	10

Power Frequency	50/60Hz
