

Orange Plastic Safety Barrier Fencing

These plastic fences are widely used as barriers for construction sites and road work. They are also suitable for home gardens, traffic control, and marking hazardous areas.

Product Overview

High-Visibility Safety Solutions

This durable HDPE safety fencing is designed for effective crowd control and hazard demarcation in demanding environments. Featuring UV-stabilized material and a high-visibility orange finish, it provides long-lasting performance for construction sites, road works, and event management. The lightweight, flexible design allows for easy installation and portability, making it an essential tool for temporary site safety and security.

Technical Specifications

Mesh Specifications

Shape	Typical Sizes (mm)
Oval	65x35
Oval	70x40

Roll Dimensions

- 1x20m
- 1x50m
- 1.2x50m
- 1.8x50m

Material	HDPE (High-Density Polyethylene) with UV stabilization
Weight Range	100g/m ² to 300g/m ²

Key Features

Key Benefits	High Strength, High Visibility, UV Resistant, Age Resistant, Soft & Portable
