

Orbital Sander for Wood and Metal Finishing

This orbital sander is designed for sanding and finishing wood and metal surfaces. Its oscillating rectangular pad and dust collection system ensure a smooth, clean finish.

Product Overview

Professional Finishing Performance

This orbital sander is engineered for high-quality surface finishing on both wood and metal materials. Featuring a rectangular sanding pad that oscillates in precise circular motions, it delivers a smooth, consistent finish suitable for professional craftsmanship. The integrated dust collection system ensures a cleaner workspace by effectively minimizing airborne particles during operation.

Technical Specifications

Power Source	Electric
Sanding Pad Shape	Rectangular
Dust Management	Yes

Features & Capabilities

Design Features

- Ergonomic grip
- Strategically placed controls
- Integrated dust collection bag

Target User Profile

Professional Craftsmen • DIY Enthusiasts

Suitable Materials	Wood, Metal
