

Outdoor Digital TV Antenna

This high-gain outdoor TV antenna is designed for optimal reception of digital television signals. Featuring a multi-element array, it enhances signal strength and minimizes interference, providing clear and reliable over-the-air broadcast reception.

Product Overview

Professional High-Gain Reception

This high-gain outdoor digital TV antenna is engineered for superior signal clarity and reliability in demanding reception environments. Featuring a sophisticated multi-element array, it effectively captures both VHF and UHF broadcast signals while minimizing noise interference. Built with weather-resistant materials and robust hardware, it ensures consistent performance even in harsh outdoor conditions.

Performance Metrics

Reception Range

1 Band

1 Band

UHF Coverage

Technical Construction

Core Features

- Optimized for weak signal strength areas
- Effective long-distance signal capture
- Includes dipole and reflector assembly
- Robust mounting hardware included

Build Materials

Weather-resistant, High-gain design, Multi-element array

Installation and Durability

Environmental Resilience

Weatherproof • Outdoor Rated
