

# Outdoor Evaporative Misting Fan

This misting fan provides a refreshing cooling experience by combining a powerful fan with a fine mist spray. It is ideal for outdoor patios, decks, and other open-air environments, effectively lowering ambient temperatures through evaporative cooling.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Evaporative Cooling

This industrial-grade evaporative misting fan provides effective cooling for large outdoor and semi-open areas. Utilizing a centrifugal misting system, it eliminates the need for nozzles and filters, ensuring low-maintenance operation. The robust design features an epoxy resin-coated surface for anti-rust durability and a high-performance motor built for longevity and stable airflow.

## Technical Specifications

Oscillation Angle	90 degrees
Speed Settings	3
Safety Features	Thermal Protector, Water Pump Protection, Waterproof Electric Design, Safety Cage

## Construction & Durability

### Build Quality

- Epoxy resin coated surface
- Cold-rolled silicon steel motor sheet
- Pure copper motor winding

## Applications

### Suitable Environments

Patios • Factories • Manufacturing Facilities • Farms • Garages • Athletic Fields • Greenhouses
