

Outdoor LED Display Module

This LED display module is designed for outdoor use. It features a black metal frame with ventilation and mounting points.

Overview

High-Performance Outdoor LED Display

This robust LED display module is engineered specifically for demanding outdoor environments. Featuring a durable metal frame construction, it includes integrated ventilation slots and active cooling fans to ensure optimal thermal management and reliability. Designed for secure installation, the module includes standardized mounting points, making it a professional-grade solution for large-scale outdoor visual displays.

Physical Construction

Frame Material	Black metal
Cooling System	Active Cooling Fans, Ventilation Slots

Installation

Environment	Outdoor Rated
Mounting Capability	Yes
