

Outdoor LED Flood Light with Adjustable Bracket

This LED flood light is designed for outdoor illumination and features an adjustable bracket for versatile mounting. The light consists of multiple LED emitters arranged in a grid pattern, providing a bright and uniform light output.

Product Overview

High-Performance Outdoor Illumination

This LED flood light is engineered for reliable outdoor performance, featuring a robust housing built to withstand environmental challenges. Designed for versatility, it includes an adjustable bracket that allows for precise mounting and orientation in various installation environments. The unit utilizes a high-efficiency grid of LED emitters to deliver bright, uniform light output suitable for security, architectural, or general area lighting.

Physical Dimensions

Overall Height	300 mm
