

Outdoor LED Street Light

This lighting fixture features a streamlined, elongated design suitable for outdoor applications. The integrated lens system optimizes light distribution for enhanced visibility and safety.

Product Overview

Professional Outdoor Lighting Solution

This outdoor LED street light features a streamlined, elongated design specifically engineered for high-performance municipal and commercial applications. The aerodynamic housing is built for maximum durability, effectively protecting internal components from harsh environmental conditions while minimizing wind resistance. Equipped with an integrated, high-precision lens system, this fixture ensures optimal light distribution to enhance visibility and safety for streets, parking lots, and pathways.

Key Features

Application Areas

Street Lighting, Parking Lots, Pathways

Technical Design

Design Advantages

- Aerodynamic shape to minimize wind load
- Durable weather-resistant housing
- Advanced integrated lens system
- Energy efficient LED technology
