

Outdoor Network Communication Device with RF Connectors

This network communication device is designed for outdoor use. It features a durable metallic enclosure and multiple RF connectors for signal input and output.

Overview

Rugged Outdoor Connectivity

This network communication device is engineered for reliable performance in demanding outdoor environments. Featuring a durable metallic enclosure and specialized RF connectors, it ensures secure signal transmission for professional broadcast and telecommunications applications. The unit is designed for ease of deployment, coming equipped with integrated mounting brackets for stable, long-term installation.

Physical Attributes

Environmental Protection

Weatherproof • Outdoor Rated

Enclosure Material	Metallic
--------------------	----------

Connectivity

RF Connectors	RF Input, RF Output
