

Outdoor Online Uninterruptible Power Supply (1-10KVA)

This outdoor online UPS delivers consistent power in challenging outdoor conditions. Available in 1-10KVA capacities with single-phase input and output, it protects against outages, voltage fluctuations, and surges.

Product Overview

Rugged Power Protection

The Outdoor Online UPS Series offers reliable, continuous power supply specifically engineered for harsh outdoor environments. With 1-10KVA capacity and single-phase input/output, it provides essential protection against power outages, voltage fluctuations, and electrical surges. This unit features a robust, weather-resistant enclosure and advanced battery management, making it an ideal solution for critical infrastructure such as telecommunications, traffic control systems, and industrial automation.

Technical Specifications

Capacity Range	1-10 KVA
Electrical Configuration	1 Phase Input / 1 Phase Output

Key Features

Protection Capabilities

- Power outage protection
- Voltage fluctuation stabilization
- Surge suppression
- Advanced battery management

Ideal Applications

Telecommunications, Traffic Control, Industrial Automation, Outdoor Infrastructure

Safety & Compliance

Safety Warnings

High Voltage • Risk of Electric Shock • Read Manual Before Operating
