

Outdoor PIR Motion Detector

This outdoor motion detector enhances security and provides convenience. Its passive infrared sensor detects movement, triggering lights or alarms, with adjustable sensitivity and a weatherproof design.

Product Overview

Professional Outdoor Motion Detection

This outdoor motion detector is engineered for robust security and convenience in both residential and commercial environments. Utilizing advanced passive infrared (PIR) sensor technology, it reliably detects movement within its range to trigger connected lighting or alarm systems. Designed with a weatherproof housing, this unit ensures consistent performance and enhanced safety across various environmental conditions.

Technical Specifications

Application Environment

Outdoor • Residential • Commercial

Sensor Technology	Passive Infrared (PIR)
Adjustable Settings	Sensitivity, Duration
Environmental Protection	Weatherproof
