Product Overview

Sustainable Outdoor Illumination

This premium outdoor solar garden light utilizes high-efficiency monocrystalline solar panels and advanced LED chips to provide reliable, eco-friendly lighting. Constructed with durable die-casting aluminum and a ribbed PC diffuser, it offers a sleek design suitable for gardens, pathways, and driveways. The unit is powered by a high-quality LiFePO4 battery, ensuring consistent operation for 2-3 rainy days on a single charge.

Technical Specifications

Battery Chemistry	LiFePO4 Lithium
Solar Panel Grade	A-Grade Monocrystalline
Rainy Day Autonomy	3 days

Materials and Build

Construction Materials	Die-casting Aluminum, PC
Maintenance Requirement	Free maintenance

Features

Ideal Applications

- Gardens
- Pathways
- Driveways

Key Advantages

Environment Friendly • Easy Installation • High Efficiency
