Product Overview

High-Efficiency Outdoor Solar Lighting

This advanced solar flood light series offers a versatile lighting solution with options ranging from 30W to 100W, designed to provide consistent illumination without external power. Equipped with high-performance Bridgelux chips and intelligent infrared sensors, the units ensure energy savings while maintaining bright, uniform output. With a robust IP65 waterproof rating and long-lasting integrated lithium battery technology, these lights are built for durability and ease of maintenance in demanding outdoor environments.

Technical Specifications

Waterproof Grade

IP65

Available Power Options

30W, 60W, 100W

Luminous Efficacy

120 lm/w

Performance Features

Key Performance Indicators

24 hours

Operating Duration

Advanced Functionalities

- Infrared Sensor for automatic induction
- Intelligent energy-saving working modes
- Integrated high-capacity lithium battery
- Bridgelux chip technology for uniform illumination
