

Outdoor Solar Security Light with Motion Sensor

This outdoor solar security light provides reliable illumination. Its motion sensor activates the light automatically, enhancing security for homes, gardens, and pathways.

Product Overview

Solar-Powered Outdoor Security Lighting

The DR-0114 is a robust solar security light designed to provide reliable, automated illumination for various outdoor environments. Featuring an independent solar panel for efficient energy collection, this unit captures sunlight to power its motion-sensing activation system. Its weather-resistant construction ensures durability in outdoor conditions, making it an ideal choice for enhancing safety and security in gardens, pathways, and around the home.

Model Number

DR-0114

Key Features

Core Functionalities

Solar-Powered, Motion Sensor, Weather-Resistant, Outdoor Rated
